## **DETAILED ACTION**

1. Claims 2-8 and 10 have been examined.

## Response to Arguments

2. Applicant's arguments, see Appeal Brief, filed on 10/6/05, with respect to claims 2-8 and 10 have been fully considered and are persuasive. The rejection of claims 2-8 and 10 has been withdrawn.

## Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: The prior art of record discloses wrapping software or application so that certain system calls are intercepted to protect system resources. The prior art of record either individually or in combination does not explicitly disclose producing combined program by encapsulating the executable application with the policy enforcement agent without changing the executable application and amending the header component of the policy enforcement agent to match the characteristics of the combined program in light of other features disclosed in independent claims 2 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Menon et al. U.S. Pat. No. 6505343 discloses a method for creating a large function software component by wrapping the large functional unit with an encapsulating program, creating a wrapped large functional unit.

Gilbrech U.S. Pat. No. 6173399 discloses encapsulated payload is provided with an additional header that identifies that the source of the packet and the packet is decomposed by the inbound VPN unit to reconstruct the original data packet.

Arrow et al. U.S. Pat. No. 6154839 discloses encapsulating packet according to internet protocol at endstation forming an outbound IP packet.
